HOPPE Quick-FitPlus connection

Quick-FitPlus

HOPPE Quick-FitPlus Less is more

HOPPE Quick-FitPlus is the logical further development of the tried and tested HOPPE Quick-Fit connection.

This technology not only allows simple installation, without the need for screws, of door handles, but also of round flat roses. The new HOPPE Quick-FitPlus sets are making an impression with their virtually flush rose design.

Simple fitting

Aesthetically pleasing flat roses and door handles using the Quick-Fit connection are installed on the door in just a few steps: The handle roses with supporting lugs are affixed to the prepared door and the door handles are simply put together. The full set is therefore installed with precision in just a few seconds without any screws – even in renovations.

Attractive design

The new Quick-FitPlus sets are a perfect match for current design trends. The stainless steel roses are just 2 mm thick and virtually flush with the door leaf.

Depending on the door preparation, they can be used with or without escutcheons.

Door preparation

This solution is for use on standard doors with standard locks. No special door preparation is needed.

You can find HOPPE Quick-Fit-Plus films at www.hoppe.com. If you have any questions please get in touch with your HOPPE contact person.
